

Multi-Media Journey Workshops and Badges for Seniors

Customization? No problem. Ask about our custom workshops for multiple age levels, and how to join an open workshop!

Engage Thru Tech offers workshops with a blend of computers and experiential activities for badges and journeys! In these **custom workshops**, we'll bring all the equipment to the **location and time of your choice!** *Schedule all three journeys in one year to earn your summit award, and receive a 10% discount on each!*

Multi-Media Journeys: "Girlltopia"

We've come so far in equality for men and women, but where do we still have room to grow? What would an ideal world look like for girls and women? Come spark your imagination, as Engage Thru Tech opens up all its "toolbox" of video production techniques and effects to you! Create a **video "work of art"** to share with the world the women's issue you feel most passionate about! Want to use our **green screen, our black screen, or our animated effects?** How about slow-mo or fast-mo, or any other kind of "mo" that you can think of? Perhaps you want to animate with our **motion capture suit?** Dream big with us, and earn a journey along the way!

NEW! Multi-Media Journeys: Senior "Think Like a Programmer"

Learn basic coding to make an educational video game that shares your passions! Take action by sharing your game with family and friends the final hour of the workshop, and earn your Think Like a Programmer Journey! This beginner coding workshop requires no prior experience or expertise!

Multi-Media Journeys: "Mission Sisterhood"

Come enjoy a wonderful blend of 3-D computer animation and experiential activities, as you embark on a mission to deepen your "sisterhood" with your circle of friends. Take our computer personality quiz to discover what your style is, and compare it to your friend's style. Then help develop a 3-D animated computer game of your own to teach others how to deepen relationships, even with those who "challenge" you the most! For the final hour of the workshop, invite family, friends, or another troop to come (at no cost to them) and play the game YOU developed, thus **COMPLETING** your take action!

Multi-Media Badges: "Website Designer" and (Ambassador level) "Photography" Badges

Get a jump start on your Gold Award by designing your own blogging website. Learn from a photographer how to take awesome photos for your website, and you are well on your way! Earn both the "Website Designer" as well as the (Ambassador level) "Photography" badges!
